

CIRCULAR SAW BLADE PLUS 2

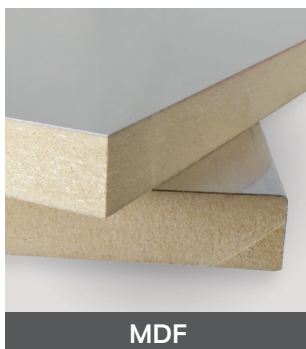

For cutting of wood based panel boards

HIGH PERFORMANCE WITH EXCELLENT FINISHING

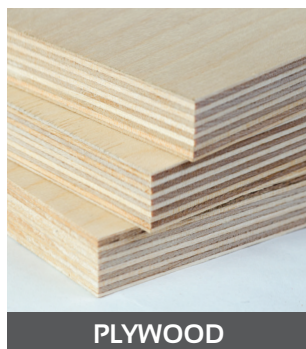

The new range of FREZITE saw blades for MDF and HDF panel cutting, called PLUS 2, is a real success in terms of performance. This new saw blade has been developed for the efficient cutting of panels with high-density, batch or single-plate.

The PLUS 2 features a high resistance carbide tip grinded with trapezoid-flat tooth, allowing longer cutting life and reduced machine downtime. Provides a clean cut, of excellent quality. To ensure good finishings on the underside, it must be used together with a scoring saw blade.

MDF

PLYWOOD

HDF

OSB

Features

- Polished tooth edge
- High wear resistance carbide tips

Advantages

- High wear resistance
- Longer running time
- Reduced machine downtime
- Productivity gains

Applications

- For panel cutting on panel sizing machines
