

SAW SEGMENTS HOGGER 893

EXTRAORDINARY FLEXIBILITY

Frezite presents its new saw segments hogger. Able to hogg along and across the grain (with or without scoring saw) the exceeding material.

It has a modular design, allowing the increase of the cutting width as per the customer's needs.

The capability of replacing the main saw and the segments without dismounting the hogging unit from the machine is another advantage. It uses light alloy for the body construction to save weight.

The 893 Hogger can accept different types of sawblades and tooth shapes. Set up can be made for long or cross grain cut diminishing the tear out on the beginning or end of the cut.

To be used in double end machines, combined edge banders and others. It's suited for the furniture and carpentry industry.

Characteristics

- Light alloy body
- Modular system, allowing the increase of the cutting width as per the customer's needs.
- Possibility of applying a PCD sawblade to increase the durability of the Hogger

Advantages

- Modular system
- Possibility of replacing the sawblade and the segments
- Reduced weight by using a light alloy body
- Can accept different types of sawblades and tooth shapes
- Easy set up of the segments for long and cross grain cut
- Reduced tear out on the beginning or end of cut

Applications

- Double end trimming machines
- Double end tenoners
- Combined edge bander's
- Etc.
